Istanbul Shoe Point Produces **Fashion Trends**

Istanbul Chamber of Commerce (ICOC) Shoe and Shoe Sub-Industry Sectoral Cluster Project

The project focuses on Istanbul based shoe manufacturers ecosystem's competitiveness reinforcement via international cooperation with global companies and institutions. Its field-range stretches out from footwear design to product distribution including manufacturing, logistics and all activities that are part of the footwear industry's value chain.

All the latest fashion trends of the footwear sector are awaiting you now. Today is the right time to import! Please find the contact details of all suppliers here.

Türkiye

THE PRESIDENT'S

MESSAGE

Distinguished Visitors,

If we start counting the ancient professions, Turks are relatively excellent at performing, shoemaking would definitely be one of those professions. Shoes were among those crafts that we were most skillful at making during our journey from the steppes of Central Asia to the fertile soils of Anatolia.

While the Huns, the first Turks that walked through Europe, were riding their horses 2400 years ago, the boots, which they had manufactured in Central Asia, helped them to cope with severe natural conditions. The boost of shoemaking is inevitable in an atmosphere, where livestock and tannery is developing and where there is constant struggle on horses. Thus, we can describe shoemaking to be "the profession of our ancestors". Thanks to this enormous ancient heritage, it is also a sector, which can highly compete and adapt to the conditions of modern age.

The most efficient method to achieve this goal is sectoral grouping, which we are aiming to realize with the Chamber's Shoe and Shoe Sub-Industry Sectoral Cluster Project. We do our best to help the Turkish shoemaking sector to take its rightful place globally in terms of design, production and international competitiveness.

I believe that with Istanbul Shoe Point Project, the revival of Turkish mastery and elegance in shoemaking is unavoidable and will spread all over the world. Furthermore, I am sure that Turkish shoemaking will also sprout with the use of the internet, social media and international marketing activities within this project.

Sincerely,

Sekib AVDAGIÇ
President of the Executive Board
Istanbul Chamber of Commerce

ABOUT

THE CLUSTER

In the contemporary trade world, the importance of taking joint action is imperative in order to increase competitive power on a global scale. Thus, in order to improve international competitiveness of the Turkish footwear companies the Istanbul Chamber of Commerce (ICOC) has initiated "ICOC Footwear and Footwear Sub-Industry Sectoral Cluster Project" with the support of the Republic of Türkiye Ministry of Trade.

The project which brings together the footwear and footwear sub-industry sectors aims to create awareness of cooperation among members by expanding export capacity, facilitating entrance to new markets and carrying out activities in favor of the sector. Organizing events involving cooperation with potential markets to strengthen largescale collaboration is also one of its main targets.

Export to Countries

Ultimate Fashionable Excellence

TURKISH

SHOE SECTOR

Türkiye is one of the world's leading leather/leather products manufacturers and exporters with \$2 billion of exports to approximately 200 countries. Product export is mostly in footwear. The Turkish footwear industry exports to 183 countries. As the 7th largest footwear manufacturing sector in the world and with a continuously increasing production capacity, the sector exports 280 million pairs of footwear, which is almost half of its total production.

While leather shoes make up a significant part of these exports in terms of value, sports shoes, and shoes made of textile have also increased in parallel with changing consumption habits in the world. Due to its flexible and fast production capabilities and being open to new investments, the Turkish footwear sector attracts the attention of many international brands.

Focusing on sustainability and corporate social responsibility, the footwear industry produces high quality products in Türkiye. With its highly qualified and well-trained labor force, advanced logistics and sophisticated design know-how our country is ready to produce for the world.

Türkiye

STRENGTHS

Experience

Türkiye is one of the rare countries that blend technology, design, art and experience together in the leather and shoe products industry. The sector, which has a history of hundreds of years, is continuously developing in a way that will increase its share in the global market.

Trend Setting Production

Istanbul Shoe Point brands have production processes and raw materials of high-end while they provide flexible production and rapid delivery. They operate in facilities equipped with modern technology and decades of experience.

High Standards

The footwear and footwear sub-industry companies throughout Türkiye place great importance on social compliance as well as high and flexible production capacity for almost all product groups. The amount of certified companies is increasing and eco-friendly production is becoming the basic motto of the Istanbul Shoe Point.

STRENGTHS

Ageless Designs

Brands that promote design and young designers are brought together with actors of the sector, who invest in their workforce and technology for value-added production.

The production capability and added -value are strengthened by closely following the latest trends in design, fashion and technology.

Accessible Facilities

The Istanbul Shoe Point brands have a huge advantage in terms of logistics thanks to Türkiye's geographical location and strategic network as well as its accessible, flexible and fast production capability. While integrated facilities allow for high quantities of production, SME firms are able to produce and deliver small-scale orders quickly through their flexible production mechanisms. Moreover, they can perform fast and carry out boutique production according to customer demand.

Right Pricing Strategy

Members of Istanbul Shoe Point Footwear and the Footwear Sub Industry Sectors offer valuable production and design capabilities that enable export of high quality products for fair prices.
